

# ComfortFit's Complete Line of Children's Prefabricated Orthotics

## Arch Angel

The **Arch Angels** comfort insoles are designed specifically to address the special needs of a child's growing feet. By utilizing a progressive arch design system they support the natural development of a child's foot. Arch Angels use a unique triple-layer design. The outer foam layers offer superior cushioning, while the inner core provides gentle support for the developing arch. These insoles are constructed of non-toxic materials, are hand washable and are designed to last through two shoe sizes.

\$12.00/pair boxed

## Comfort-Gait Plate

The **Comfort-Gait Plate** helps prevent in-toe gait by reducing the tendency to walk over the lateral border and encourages correct first metatarsal-phalangeal joint propulsion in children. The rigid polydor thermoplastic design provides maximum control and it fits comfortably in most footwear.

\$25.50 /pair

## Comfort Kid

The **Comfort Kid** provides highly effective therapy for children needing control of severe pronation and ankle instability. A patented multi-layer, firm anti-pronatory orthotic that will control the subtalar joint. Firm medial and lateral flanges with a foam Pelite soft top cover and anti-slip silicon bottom.

\$29.99 /pair
