

Your Image Just Got Better

New iTOM-CAT Scanning System

ComfortFit Labs, along with its technology partner TOM-CAT Solutions, is now offering the biggest breakthrough in foot and ankle scanning technology to date. This is a “full solution” that has integrated all hardware and software into a single, easy to use, full function scanning system. This new iTOM-CAT is an iPad Air 2 based system that uses ComfortFit’s standard, easy to use prescription order form. The system uses a structured sensor to capture a 3-D image that has an accuracy of 0.2 mm and that is much more accurate than most competitive in-office scanning systems.

Uses standard Apple iPad Air 2 – use your own or buy it from us
FULL technical and administrative support – make only one call for help

Faster turnaround times, faster in-office casting (no mess, no casting)

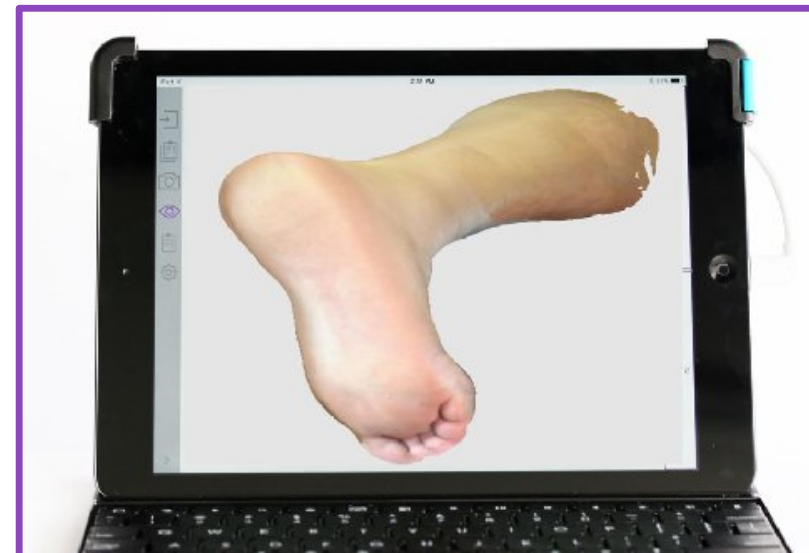

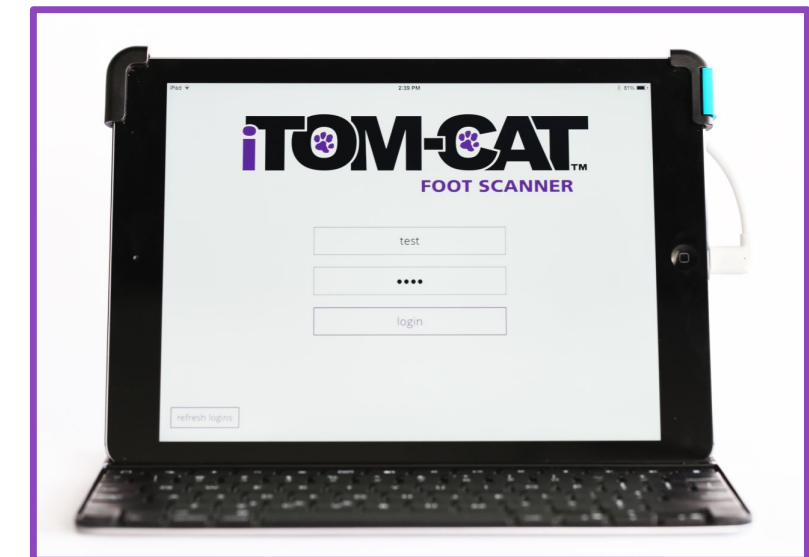

Reduced paper flow and improved in-office patient tracking and history

Easy start-up with free system calibration (one time requirement for accuracy)

HIPAA compliant Software

Lifetime cast storage

No hidden fees

COMING SOON:

iTOM-CAT Richie Brace scanning capability & foot sizing for diabetic shoes
